Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

HC

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted 1/12/04 has been considered by the examiner.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3, 8, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kasuga et al. (US 5,794,979 A) and in further view of Japanese publication JP 2002-205556.

Kasuga et al. discloses an apparatus comprising a rear floor pan 25 with U-shaped part 25d and wing panels 25c located behind a seat , and a mounting rack 5 including a first frame 13,14, a second frame 11,12 mounted on said first frame, and connecting members 10a,b for securing said rack on said wing panels, as shown in figures 1-7. Kasuga et al. does not disclose the mounting rack for supporting batteries and inverter. The use of batteries with inverters in electric and/or hybrid vehicles is well-known in the art and it would have been obvious to one having ordinary skill in the art at the time of the invention to have used the mounting rack of Kasuga et al. to support batteries and an inverter in the rear part of an electric or hybrid vehicle.

Allowable Subject Matter

4. Claims 2 and 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
